INTRODUCTION

Kentucky coal production for 1978 was 136,841,463 tons. The 1978 production of 136,841,463 tons was down from the record all time high of 147,605,995 tons produced in 1977. A United Mine Workers of America strike in January, February, and March, 1978, and a soft "spot" market both contributed to the decrease in production in 1978. Kentucky remained the nations largest coal producing state by outdistancing West Virginia by about fifty two million tons. In 1978, over seventy five million tons of coal were mined by surface operations while over sixty one million tons were mined underground.

The coal industry furnished direct employment for 64,335 miners.

Eighteen miners were killed in Kentucky coal mine accidents in 1978 compared to thirty-six fatals in 1977.

The clay mining industry mined 521,379 tons in 1978. No fatal accidents occurred at clay mines during the year.

The following chart compares production of the various types of coal mines for the past two years:

	PRODUCTION IN TONS

DIRECTORY AND STATISTICS OF DEPARTMENT OF MINES AND MINERALS INSPECTION DISTRICTS

To facilitate the mine inspection duties of the Department, the coal fields have been divided into five inspection districts. A mine rescue station which serves as the district office is centrally located in each district. The Eastern Kentucky coal field is divided into four districts, with mine rescue stations located at Harlan, Hazard, Martin and Pikeville. An office at Madisonville serves the Western Kentucky coal field.

The operations for the district offices is directed from the office of the Commissioner located in Lexington. General staff and Lexington office personnel are as follows:

The Directory and Statistics of Coal Mines contained in the following pages is separated by Inspection Districts and by Counties.

Code letters to classify mines are as follows:

UTC	Underground Truck Coal
URC	Underground Rail Coal
UWC	Underground Water Coal
STC	Strip Truck Coal
SRC	Strip Rail Coal
ATC	Auger Truck Coal
ARC	Auger Rail Coal
ASTC	Auger-Strip Truck Coal
ASRC	Auger-Strip Rail Coal
STCL	Strip-Truck Clay

Notations made are as follows:

a	abandoned
c	change of ownership
*	estimated tonnage
ta	temporarily abandoned

Production, employment, and accident figures for River mines have been included in the totals for Rail mines for the purpose of compiling these statistics.

Many of the coal production figures of individual mines which appear herein have been estimated by the Department. This was necessary because the reports of the operators of those mines, particularly mines which became abandoned during 1977, were delinquent at the time of publication.

HARLAN DISTRICT

The Harlan Inspection District is made up of Bell, Clay, Clinton, Harlan, Knox, Laurel, McGreary, Pulaski, Rockcastle, Wayne, Whitley Counties, and part of Leslie County. The office is located at the corner of Mound and Elm Streets, Harlan, Kentucky.

There were 869 commercial coal mines in the Harlan District during 1978. One thousand one hundred and forty-seven inspections were conducted. Fifty-five mines were temporarily closed for unsafe conditions and/or practices until proper corrections were made. Ninety-five mines were temporarily closed for other conditions until corrected. Records show that 154 mines were abandoned and 72 miles posted idle in the district during the year 1978.

Personnel of the Harlan District are as follows:
Lee Wilson, District Supervisor
Dewey Middleton, Sr. Mining Inspector
Leroy Gross, Sr. Mining Inspector
Charles Sargent, Sr. Mining Inspetor
James Gilbert, Sr. Mining Inspector
Homer Johnson, Sr. Mining Inspector

MINE FIRES AND IGNITIONS IN KENTUCKY

FEBRUARY 10, 1978, CAMP NO. 2 MINE, PEABODY COAL COMPANY, MORGANFIELD, UNION COUNTY. An explosion occurred at 1:30 P.M. on the surface at the No. 2 air shaft as an LP gas distributor was attempting to refill a 1000 gallon storage tank. The cause of the explosion was determined to be a leaking hose that allowed the gas to ignite. The distributor sustained 2nd and 3rd degree burns on the face, back, buttocks, left arm and legs. All personnel was removed from the area and the fire was allowed to burn itself out.

MAY 9, 1978, MINE NO. 1, PONTIKI COAL CORPORATION, LOVELY, MARTIN COUNTY. An ignition occured at 5:00 P.M. in the right crosscut of the No. 5 Heading of the 003 Section. Coal was being mined at the time by a Joy Continuous Miner when the miner bits came into contact with the roof and the ignition occurred. The ignition was of a short duration. There were no personal injuries.

OCTOBER 18, 1978, MINE NO. 1, PONTIKI COAL CORPORATION, LOVELY, MARTIN COUNTY. An ignition occurred at 9:50 P.M. at the face of the No. 5 Entry of the 004 Section. The continuous miner was loading coal when an ignition of approximately 2 seconds occurred when a sulphur ball caused sparks that ignited a small pocket of gas. There were no personal injuries.

OCTOBER 25, 1978, MINE NO. 1, PONTIKI COAL CORPORATION, LOVELY, MARTIN COUNTY. An ignition occurred at 12:30 P.M. in the left crosscut of the No. 2 Entry on 004 Section. The continuous miner was in the process of cutting cap coal from the roof when an ignition occurred and traveled for approximately 5 feet across the face of the entry. There were no personal injuries.

NOVEMBER 1, 1978, MINE NO. 1, PETER CAVE COAL COMPANY, LOVELY, MARTIN COUNTY. An ignition occurred at 8:30 A.M. in the No. 5 Room, 2nd Right off 6 Right in the 014 Section when the ripper heads of the continuous miner encountered several sulphur streaks. The ignition was of a short duration. There were no personal injuries.

DECEMBER 27, 1978, FIES NO. 11 MINE, ISLAND CREEK COAL COMPANY, MADISONVILLE, HOPKINS COUNTY. A fire occurred at 2:50 P.M. in the 1st Main North off 1st Main East (12) crosscuts inby 1st Main East as an 8-ton Jeffrey motor was being used to transport a shuttle car on which a belt had been placed on top of the car for protection against the trolley wire, to a different section of the mine. The shuttle car was being pulled in a reverse position when a wheel underneath the trolley wire apparently ran upon a rock allowing the cable guide to come into contact with the trolley wire, resulting in a fire from the contact. Power was pulled from the trolley wire and a water hose was laid from outby the car and the fire extinguished. There were no personal injuries.

TRAINING AND EDUCATION

A full time Training and Education program was established in 1971 with a Federal Grant from the U.S. Bureau of Mines, now known as the Mining Health and Safety Administration (M.S.H.A.). This is a very effective program and is staffed with ten well-qualified mining instructors and four electrical instructors who are stationed in the five district offices and mine rescue stations.

Since March of 1972 this agency has acted as a process agent for the educational institutions in establishing Schools of Mining Technology. Presently the participating schools are Pikeville College, Moorehead State University and Madisonville Community College. Also, the Kentucky Department of Education is participating in this grant by offering statewide classes for miners through their Vocational Schools.

The following list shows the type of certificates issued and the number of men involved in the different safety courses conducted in 1978. (This includes both organized classroom work and field work.)

MINER TRAINING, EDUCATION AND CERTIFICATION DIVISION

The Board of Miner Training, Education and Certification as provided by Chapter 351, Paragraph 105, Kentucky revised Statutes, was composed of the following members in 1978:

H.N. Kirkpatrick	Chairman
Jerry Wynn (2 year appt.)	Miner Member—Eastern Kentucky[1]
Paul Patton (3 year appt.)	Operator Member—Eastern Kentucky
Bobby Ray Dukes (4 year appt.)	Miner Member—Western Kentucky
Thomas R. Ford (1 year appt.)	Operator Member—Western Kentucky[2]
Larry L. Combs (4 year appt.)	Operator Member—Western Kentucky[3]
William E. Clayton, Director, Miner Training, Education and Certification	Non-Voting Member

Pursuant to KRS 351.106 Underground Miner Training and Certification Regulations were implemented in October 1977. During 1978 the required 48-hour inexperienced miner's program was prepared and the first classes were taught in May 1978. Thru December 1978, 1,948 persons were issued Temporary Inexperienced Miner's Work Permits.

After the Underground Miner Training and Certification Regulations were implemented in October 1977, the Board of Miner Training, Education and Certification established a date of November 1, 1978 as the date all persons employed in underground mines should meet this requirement. Therefore, underground miners who presented valid evidence of having worked a minimum of 90 working days prior to November 1, 1978 would be issued certificates in accordance with KRS 351.102. During the remaining two months of 1978 only a small number of applications were presented to the Commissioner, therefore, the initial certification program for underground miners will not be completed until 1979.

Uniform two-day examinations for Mine Foremen and Inspectors were scheduled by the Board to meet the demand whenever it arose. Examinations were held in the Department offices in Lexington and at various localities throughout the coal fields whenever the number of applicants made it justifiable. Mr. Doug Monroe served as Chief Examiner and Mrs. Margaret Caywood as Exam Clerk.

Examinations were multiple choice in character. Applicants were given written examinations on the subjects of Mine Law, First Aid, Ventilation, Apparatus and Electricity, fires and Explosions, Explosives, General Mining Practices and Gases. Each applicant was tested on his ability to detect methane with a flame safety lamp, and use an anemometer in the calculation of the rate of air current flow. He was further required to prove his practical knowledge of safe mining practices in an interview with an Examiner and to indicate safe and practical method of ventilation on a typical mine map.

A list of the men who successfully completed the required examination for foremen and inspectors is shown on the following pages:

[1] Resigned November 20, 1978

[2] Term Expired February 23, 1978

[3] Appointed to replace Mr. Ford February 24, 1978

LARRY HOFFMAN
DIRECTOR, MINE SAFETY ANALYSIS DIVISION

MINE SAFETY ANALYSIS DIVISION

During the calendar year, the Division of Mine Safety Analysis completed 166, 631 contacts and observations of this Commonwealth's underground coal miners. This figure represents 13,522 of the total number of 26,600 underground coal miners employed in the 1,800 licensed mines.

The Division is now staffed with a Director, 5 District Supervisors, and 68 Mine Safety Analysts. The program has been very effective due to the team effort brought forth by industry management, representatives of labor, and Safety Analysts.

In order to establish a better working relationship between the coal industry and the regulating agencies, the Division of Mine Safety Analysts participated in an effort to give on-the-job safety counseling, and to assist underground miners in correcting any unsafe or potentially hazardous actions. The Division has also participated in the organization of State Mine Rescue teams for service to the coal industry.

This Division contains some of Kentucky's best qualified mining personnel, trained in Mine Rescue Operations, Management Techniques, Cardio-Pulmonary Resuscitation, Mine Ventilation, Roof Control, First-Aid Methods, Gases and Detection, Mining Operations Methods, Mining Law, and most of all, Human Relations.

The Division of Explosives and Blasting spent considerable time and effort in 1978 engaged in the implementation of the surface mine regulations concerning the use of explosives.

These regulations were promulgated by the Kentucky Department of Natural Resources and Environmental Pretection to comply with the requirements of the Federal Surface Mining Reclamation and Control Act of 1977. Since the Explosives and Blasting inspectors were trained, equipped and already inspecting surface mine blasting operations, it was proposed that they also enforce the blasting standards required by the Federal Act. The Department of Mines and Minerals signed an agreement with the Department of Natural Resourced and Environmental Protection in April 1978, whereby the Division of Explosives and Blasting would enforce blasting regulations for the state Bureau of Surface Mining Reclamation and Enforcement. It is felt that this will allow for consistent and competent inspection in all phases of blasting, and avoid duplication.

The Federal Act also has provisions for a nationwide certification and training program for blasters in surface coal mines. Federal regulations concerning this aspect were proposed in March, 1978.

The Division of Explosives and Blasting participated in several public hearings and meetings with officials from the United States Department of the Interior concerning the certification and training regulations. The Division has tried, with its input, to cause the Office of Surface Mining to promulgate reasonable and workable regulations in this matter. Hopefully, this Federal certification will be compatible with the state licensing procedure.

Our blasters training course has continued throughout 1978 with great success. The demand for courses in various areas of the state has exceeded our resources to supply them. Thirty hour training sessions were conducted in ten cities located throughout the Commonwealth, and were attended by over four hundred blasters. Many of the explosive companies have aided the instructors by providing technical data, movies, slides and other demonstration devices for the courses. As new technology and methods are developed in the explosive industry, the instructors try to incorporate them into the classes. The purpose being to provide the blasters in the field with current knowledge available in blasting techniques, safety and legal requirements. The public is better protected by enhancing the blaster's ability and knowledge in all aspects of explosive use.

During 1978 the Division also took part in various seminars for other state and local agencies which are involed in various phases of the explosive industry. A number of meetings were held with citizen groups who were having or anticipating problems with blasting operations.

The Fifth Annual Blasting Conference was held in December, 1978, in Lexington. Approximately two hundred and fifty persons attended this meeting; all personnel in the Division of Explosives and Blasting were present. This offered an opportunity for representatives of all areas of the explosive industry to get together to discuss mutual concerns.

OIL PRODUCTION

The oil production for 1978 was 5,724,272.55 barrels, which is down approximately 746,417.73 barrels from 1977. Oil production has been on a straight-line 10% decline since 1960. Even though drilling activity has increased significantly since the early 1970's, new discoveries have not offset the natural decline of oil and gas fields. Kentucky's gas production for 1978 amounted to 70,044,439 MCF.

INTRODUCTION

Kentucky coal production reached an all time high of 149,837,091 in 1979. The 1979 production of 149,837,091 tons was over 2 million tons higher than the previous record year high of 147, 605,992, set in 1977. Kentucky remained the nation's largest coal producing state by outdistancing the nearest rival by thirty-six million tons. In 1979, over seventy-three million tons of coal were mined by surface operations while over seventy-six million tons were mined underground.

The coal industry furnished direct employment for 57,708 miners.

Thirty-three miners were killed in Kentucky coal mine accidents in 1979.

The clay mining industry mined 395,633 tons in 1979. No fatal accidents occurred at clay mines during the year.

The following chart compares production of the various types of coal mines for the past two years:

The Directory and Statistics of Coal Mines contained in the following pages is separated by Inspection Districts and by Counties.

Code letters to classify mines are as follows:

UTC	Underground Truck Coal
URC	Underground Rail Coal
UWC	Underground Water Coal
STC	Strip Truck Coal
SRC	Strip Rail Coal
ATC	Auger Truck Coal
ARC	Auger Rail Coal
ASTC	Auger-Strip Truck Coal
ASRC	Auger-Strip Rail Coal
STCL	Strip-Truck Clay

Notations made are as follows:

a	abandoned
c	change of ownership
*	estimated tonnage
ta	temporarily abandoned

Production, employment, and accident figures for River mines have been included in the totals for Rail mines for the purpose of compiling these statistics.

Many of the coal production figures of individual mines which appear herein have been estimated by the Department. This was necessary because the reports of the operators of those mines, particularly mines which became abandoned during 1979, were delinquent at the time of publication.

HARLAN DISTRICT

The Harlan Inspection District is made up of Bell, Clay, Clinton, Harlan, Knox, Laurel, McCreary, Pulaski, Rockcastle, Wayne, Whitley Counties, and parts of Leslie County. The office is located at the corner of Mound and Elm Streets, Harlan, Kentucky.

There were 678 commercial coal mines in the Harlan District during 1979. One thousand one hundred and thirty-one inspections were conducted. Thirty-two mines were temporarily closed for unsafe conditions and/or practices until proper corrections were made. Fifty-nine mines were temporarily closed for other conditions until corrected. Records show that 78 mines were abandoned and 269 mines posted idle in the district during the year 1979.

Personnel of the Harlan District are as follows:
Lee Wilson, District Supervisor[1]
Dewey Middleton, Acting District Supervisor[2]
Leroy Gross, Sr. Mining Inspector
Charles Sargent, Sr. Mining Inspetor

MINE FIRES AND IGNITIONS IN KENTUCKY

MARCH 11 AND 14, 1979, CAMP NO. 1 MINE, PEABODY COAL COMPANY, MORGANFIELD, UNION COUNTY. A fire of undetermined origin was discovered by two third-shift electricians at approximately 2:15 A.M., at the intersection of the Main West Entries and the second sub-Main South. The fire was located in the return airway on the far side of the belt behind the stopping line separating the return air from the belt and track entries which are on a neutral split.

Attempts to extinguish the fire with water hoses failed due to a roof fall occurring in the fire area. The fire area was sealed off and an attempt to extinguish it with liquid CO_2 by means of a borehole was made. This was accomplished on March 14, 1980 and results of tests indicated that it was safe to re-enter the mine.

The exploration crew was composed of MSHA, Kentucky Department of Mines and Minerals and Peabody Coal Company personnel. The crew had traveled 4,400 feet from the slope bottom along the Main West Entries when a second fire was discovered. Additional help was immediately dispatched undeground to help fight the second fire.

During this period, monitoring of the first fire continued by means of the borehole. At 2:15 P.M., the following readings were obtained:

CO_2 - 20+%
CO - 5,000+ ppm
O_2 - 17-18½%
Methane CH_4 - 10+%

After analyzing the results, the exploration crew and fighters were withdrawn from the mine. When all personnel were evacuated from the mine and accounted for, a meeting was held to discuss the next possible course of action. The group was in agreement that the second fire, although appearing to be out, could and possibly would rekindle under a rock fall that had covered it and continue to burn after the water hoses were taken away. The decision was made that the only way to extinguish the fire was to seal the mine and attempt to smother it.

During the preparations to seal the mine, a decision was made to delay the sealing of the mine until a borehole could be drilled into the second fire area. This borehole was completed at approximately 1:00 P.M., Thursday, March 15, 1979 and instruments were allowed to test the atmosphere in the area. It was determined that there was very little CO in the area. CO_2 was then pumped through the borehole into the area and constant monitoring continued in order to detect any changes in the two-fire area.

On Friday, March 16, 1979, a second borehole was drilled into the first fire area so that the area could be saturated with CO_2. At approximately 7:00 A.M., on March 18, 1979, this was completed.

A meeting was held by all concerned personnel to assess the situation on the day the second borehole was started. It was agreed that all factors concerning the fires being extinguished at this time looked favorable and monitoring of the fire areas would continue. Everyone concerned was in agreement that, if favorable readings continued and improved, the mine could be re-entered.

During the weekend, additional CO_2 was pumped into both fire areas. On Monday, March 19, 1979, all concerned agencies were contacted and informed of plans to re-enter the mine. After the mine fans were put in operation, a five-man crew entered the mine to explore the two areas where the fire occurred. (While the crew explored the mine, two mine rescue crews served as back-ups in case of emergency.)

When the exploration crew returned to the surface in the afternoon, the decision was made to fire boss the entire mine. If found safe, the power would be restored and clean-up activities would commence. The fire bossing did not find any unsafe areas and power was restored to the mine on March 20, 1979, at 12:35 A.M. As of this date, the cause of both fires are of undetermined origin. There were no personal injuries.

NOVEMBER 26, 1979,CAMP NO. 1 MINE, PEABODY COAL COMPANY, MORGANFIELD, UNION COUNTY. On November 26, 1979, three employees remained underground between shift changes to weld a guard on the cutting machine of the Number 1 Unit. After completeing the task, the men traveled to another section and upon returning, discovered that the cutting machine was on fire. The fire was quickly controlled and extinguished. There were no personal injuries.

TRAINING AND EDUCATION

A full time Training and Education program was established in 1971 with a Federal Grant from the U.S. Bureau of Mines, now known as the Mine, Safety, and Health Administration (M.S.H.A.). This is a very effective program and is staffed with ten well-qualified mining instructors and four electrical instructors who are stationed in the five district offices and mine rescue stations.

Since March of 1972 this agency has acted as a process agent for the educational institutions in establishing Schools of Mining Technology. Presently the participating schools are Pikeville College, Morehead State University and Madisonville Community College. Also, the Kentucky Department of Education is participating in this grant by offering statewide classes for miners through their Vocational Schools.

The following list shows the type of certificates issued and the number of men involved in the different safety courses conducted by this Division in 1979. (This includes both organized classroom work and field work.)

MINER TRAINING, EDUCATION AND CERTIFICATION DIVISION

The Board of Miner Training, Education and Certification as provided by Chapter 351, Paragraph 105, Kentucky revised Statutes, was composed of the following members in 1979:

Willard Stanley	Chairman[1]
H.N. Kirkpatrick	Chairman[2]
William Joe Morgan	Miner Member—Eastern Kentucky[3]
Paul Patton	Operator Member—Eastern Kentucky
Bobby Ray Dukes	Miner Member—Western Kentucky
Larry L. Combs	Operator Member—Western Kentucky[4]
George W. Kyle	Operator Member—Western Kentucky[5]-[6]
H. Tom Barton	Operator Member—Western Kentucky[7]
William E. Clayton, Director, Miner Training, Education and Certification Division	Non-Voting Member

Pursuant to KRS 351.106 Underground Miner Training and Certification Regulations were implemented in October 1977. During 1978 the required 48-hour inexperienced miner's program was prepared and the first classes were taught in May 1978. Thru December 1979, 6,882 persons were issued Temporary Inexperienced Miner's Work Permits.

After the Underground Miner Training and Certification Regulations were implemented in October 1977, the Board of Miner Training, Education and Certification established a date of November 1, 1978 as the date all persons employed in underground mines should meet this requirement. On October 26, 1979 27,137 persons who had presented valid evidence of having worked a minimum of 90 working days prior to November 1, 1978 were mailed certificates in accordance with KRS 351.102. Between October 28, 1979 and December 31, 1979, 1,143 persons were grandfathered in making a total of 28,280 certified underground miners in the Commonwealth.

Uniform two-day examinations for Mine Foremen and Inspectors were scheduled by the Board to meet the demand whenever it arose. Examinations were held in the Department offices in Lexington and at various localities throughout the coal fields whenever the number of applicants made it justifiable. Mr. Doug Monroe served as Chief Examiner and Mrs. Margaret Caywood as Exam Clerk.

Examinations were multiple choice in character. Applicants were given written examinations on the subjects of Mine Law, First Aid, Ventilation, Apparatus and Electricity, Fires and Explosions, Explosives, General Mining Practices and Gases. Each applicant was tested on his ability to detect methane with a flame safety lamp, and use an anemometer in the calculation of the rate of air current flow. He was further required to prove his knowledge of safe mining practices in an interview with an Examiner and to indicate safe and practical method of ventilation on a typical mine map.

A list of the men who successfully completed the required examination for foremen and inspectors is shown on the following pages:

[1] Appointed December 20, 1979

LARRY HOFFMAN
DIRECTOR, MINE SAFETY ANALYSIS DIVISION

MINE SAFETY ANALYSIS DIVISION

During the calendar year, the Division of Mine Safety Analysis completed 326,633 contacts and observations of this Commonwealth's underground coal miners. This figure represents 16,677 of the total number of 26,600 underground coal miners employed in the 1,167 licensed underground mines.

The Division is now staffed with a Director, 5 District Supervisors, and 71 Mine Safety Analysts. The program has been very effective due to the team effort brought forth by industrv management, representatives of labor, and Safety Analysts.

In order to establish a better working relationship between the coal industry and the regulating agencies, the Division of Mine Safety Analysts participated in an effort to give on-the-job safety counseling, and to assist underground miners in correcting any unsafe or potentially hazardous actions. The Division has also participated in the organization of State Mine Rescue teams for service to the coal industry.

This Division contains some of Kentucky's best qualified mining personnel, trained in Mine Rescue Operations, Management Techniques, Cardio-Pulmonary Resuscitation, Mine Ventilation, Roof Control, First-Aid Methods, Gases and Detection, Mining Operations Methods, Mining Law, and most of all, Human Relations.

DIRECTOR EXPLOSIVES AND BLASTING

EXPLOSIVES AND BLASTING SECTION

During 1979 300 new general licenses were issued and 3, 989 general licenses were renewed. Twenty-two new limited licenses were issued, and 53 limited licenses were renewed. There were 494 general examinations given, and 53 limited examinations given. All applicants must pass the examination prior to obtaining a license, since the grandfather clause, allowing persons to be licensed by virtue of experience, was eliminated in 1976.

The Division of Explosives and Blasting continued its program of inspection, enforcement, education, and licensing of blasters during 1979.

A great deal of time has been spent investigating public complaints of the adverse effects of blasting operations. The number of such complaints seems to increase each year as people become more aware that the laws enforced by this division are meant to protect them and their property. A corresponding increase in the amount of seismic monitoring of blasting vibration has also been achieved. The division has increased its seismic capability by approximately 50% with the acquisition of more seismographs.

Routine inspection of explosive storage magazines and explosive transportation vehicles are continuing and these facilities are significantly improving in terms of security and safety. Stepped-up enforcement undoubtedly is encouraging this.

The Division is also still operating under an agreement with the Department of Natural Resources, Bureau of Surface Mine Reclamation and Enforcement to aid implementing the explosive provision of the Federal Surface Mine Act of 1977. Our cooperation with the Department of Natural Resources has allowed for competent, continuing inspections of surface coal mine blasting operations with a minimum of duplication.

During 1979 the Division participated in hearings concerning Federal certification of blasters proposed by the Office of Surface Mining. This Federal certification will create a national blasters examination, and national blasters license.

The blasters training courses continued throughout the state in 1979. The demand for these courses still exceeds our resource to supply them. Thirty-hour training sessions were conducted in eight cities located throughout the Commonwealth, and were attended by two hundred ninety-eight blasters. As technology improves in the explosives field, the instructors update the course to include these advances. The over-all purpose of the courses is to raise the competency level of the blasters in the field. The public is better protected, and the blaster's work environment becomes safer when his ability in blasting is enhanced through education.

During the year the Division also took part in a number of safety seminars conducted by companies, institutions, and agencies engaged in various aspects of explosives.

The Division also has worked with other state agencies such as the Disaster and Emergency Services Division, Department of Transportation, Department of Labor, and the Fire Marshall's Office in areas concerning explosive accidents and regulation.

OIL PRODUCTION

The oil production for 1979 was 5,513,688 which is down approximately 210,585 (37%) from 1978. Drilling activity increased significantly in 1979 (1828 permits issued vs 1357 issued in 1978) and is probably the reason the production decline has leveled off from recent years.
